

## Dustin Meyer

---

Senior VP of Policy, Economic & Regulatory Affairs  
American Petroleum Institute

Dustin Meyer is Senior Vice President of Policy, Economics and Regulatory Affairs, leading API's public policy departments and overseeing the organization's economics, research, and regulatory functions.

He previously served as API's Vice President of Natural Gas Markets, dealing with issues related to domestic and global natural gas markets, as well as natural gas technology and innovation including renewable natural gas, differentiated/responsibly sourced natural gas, hydrogen and the use of CCUS in the power sector.

Prior to joining API, Meyer led analytics, forecasting and consulting services on global LNG and renewable energy markets for Energy Ventures Analysis. He also held analysis positions at PFC Energy and then IHS Energy on upstream investment in North American oil and natural gas, including liquefaction projects in the U.S. and Canada. Meyer also worked at ICF International on the transportation policy team and for various NGOs.

He earned his undergraduate degree at Princeton University and received his Master's focused on Energy Policy & Economics from Yale University.
