

Steve Shaup

Principal, Senior Vice President
TranSystems

Steve is a Principal and Senior Vice President with TranSystems, having spent his entire 31-year career working out of the Fort Lauderdale office. He has worked on and managed fixed and movable bridge projects in Florida and nationally, performing inspection, assessment and design. He has managed award-winning rehabilitation projects, including the Haulover Cut Bridge Rehabilitation in Miami-Dade County that was awarded an American Institute for Steel Construction National Award for Bridge Rehabilitation and the Loxahatchee River Bridge Rehabilitation that was done for Brightline, which received an ACEC National Recognition Award. Steve was a co-author of the AASHTO Guidelines for Historic Bridge Rehabilitation and Replacement and has worked on historic bridge projects including rehabilitation of the Bridge of Lions in St. Augustine. He has also supported the Florida DOT and local agencies with post-hurricane emergency response, including after Hurricane Ian in 2022. Steve is a member of numerous technical organizations including Heavy Movable Structures, AREMA, AISC and ASCE.
